July 16th 2018 in ROGÓW - Educational Centre for Natural Forest Management.

### **Accommodation:**

Educational Centre for Natural Forest Management WULS in Rogów, in student dormitory <http://cepl.sggw.pl/>

### **Welcome to Rogów**

The Rogów village is the capital of the Rogów commune. In Rogów there is an Arboretum founded in 1923 - research and teaching facility in the field of dendrology and forest botany. As part of Warsaw University of Life Sciences, the Arboretum is one of the largest botanical gardens of its kind in Poland. Organisationally, it reports to the Rogów Forestry Experimental Station, which also includes the Nature and Forestry Education Centre, the Rogów Forestry Inspectorate and the Plant Nursery Training Centre. Located in a thinned-out area of forest, it has the character of a forest park. With one of the most abundant and fascinating collections of trees and shrubs in Central and Eastern Europe, it is completed with experimental forestry plots containing foreign species of forest trees and an alpine garden, a favourite with many of our visitors. One of the tourist attractions of the Rogów commune is Rogowska Narrow-Gauge Railway. The route takes you from Rogów through Jezów, Rawa Mazowiecka to Biała Rawska. The railway tracks lead through picturesque terrains at the foot of Wzniesienia Łódzkie and further to the hilly areas of Mazovia.
