

WP3 - Mapping of internationalization of CASEE university partners

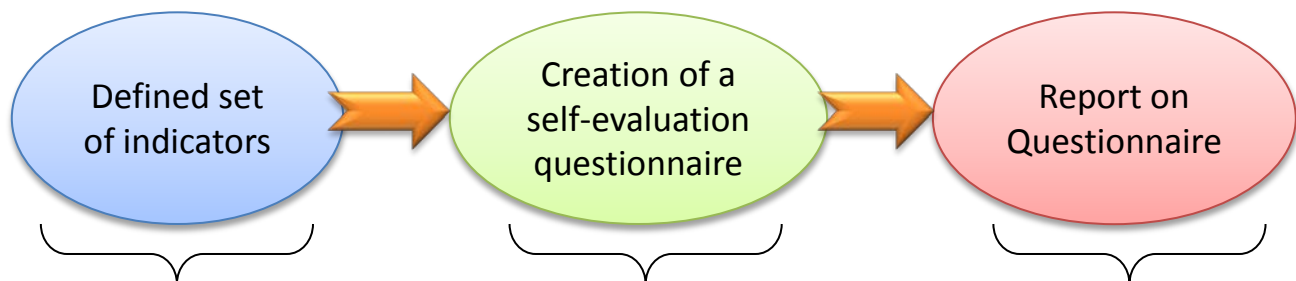

Ivona Filipovic, M.Sc.

University of Zagreb Faculty of Agriculture, Svetosimunska 25, 10000 Zagreb, Croatia, ifilipovic@agr.hr

THE OVERALL OBJECTIVE

Improvement of internationalization of partner universities and CASEE network with accent on innovative mobility activities and setting up of tools for internationalization process.

METHODS OF DATA COLLECTION

- 1. Inputs - resources available
- 2. Outputs – results of inputs
- 3. Outcomes - overall achievements

Mapping of Internationalization
 Created by 5 different EU and non-EU member states
 Completed by each partner university
 9 chapters / 44 questions

Evaluated by the CASEE-In Evaluation Board
 Immediate needs of the project consortium
 “Best practice example” for the other CASEE universities

MUTUAL WEAK POINTS

- lack of foreign language (primarily English) and didactic courses for teachers;
- lack of fund for incentives for internationalization;
- recruitment of international students (as starting point of the student life cycle);
- lack of fully developed management of the student life cycle.

CONCLUSIONS

- There are different levels of internationalization between the partner universities but in general the level achieved is already high
- Focus should be on some activities as there will be no time to address all of the items in the last project year

RECOMMENDATIONS FOR UNIVERSITIES:

- Introduction of foreign language courses and didactic courses for teachers
- Development of a students recruiting plan
- Development of funds for internationalisation
- Development of the management plan for the student life cycle
